Studijski programi za koje se organizuje: Medicinski fakultetu Podgorici

Uslovljenost drugim predmetima: Nema uslovljenosti

Ciljevi izučavanja predmeta:

Cilj nastavnog predmeta je da se studenti upoznaju sa svim aspektima boli. Počevši od anatomije puteva kojim se prenose bolni impulsi, preko fizioloških mehanizama kojima se ti impulsi prenose, studenti će se upoznati i sa metodama procjene intenziteta boli, farmakološkim i nefarmakološkim načinima liječenja boli, kao i sa pojedinim vrstama boli.

Ime i prezime nastavnika i saradnika:

Prof. dr Danko Živković, Prof. dr Ljiljana Kezunović, Prof. dr Ljubica Pejakov i saradnici

Metode nastave i savladavanja gradiva:

Predavanja, seminari

Zašto HEPMP projekat?

Bol je vjerovatno jedan od najstarijih i najuniverzalnijih oblika stresa i jedna od najranijih patnji čovječanstva. Pratilac je mnogih bolesti i stanja i uprkos naporima i činjenici da je star koliko i samo čovječanstvo, bol niti je dovoljno shvaćen niti ga je moguće kontrolisati u potpunosti.

Svijest zdravstvenih radnika o značaju liječenja bola je na niskom nivou.

Ciljevi projekta HEPMP

- Jačanje kapaciteta visokog obrazovanja u oblasti medicine bola u zemljama Zapadnog Balkana;
- Edukacija zdravstvenih radnika u oblasti medicine bola;
- Usavršavanje kurikuluma predmeta Medicine bola na osnovnim studijama Medicinskog fakulteta.
- Uspostavljanje akademske mreže i poboljšanje stručne saradnje uz pomoć savremenih tehnologija (internet, telemedicina, itd.).

Konzorcijum projekta čine predstavnici devet ustanova: Medicinski fakultet Univerziteta u Beogradu, Medicinski fakultet Univerziteta u Kragujevcu, KBC «Dr Dragiša Mišović-Dedinje», Medicinski fakultet Univerziteta u Podgorici, Medicinski fakultet Univerziteta u Tuzli, Medicinski fakultet Univerziteta u Banja Luci, Medicinski fakultet Univerziteta u Rijeci, Medicinski fakultet Univerziteta u Firenci i Medicinski fakultet Univerziteta u Ljubljani.

ERASMUS + KA2 projektu: “Strengthening Capacities for Higher Education of Pain Medicine in Western Balkan Countries -HEPMP”

(Jačanje kapaciteta visokog obrazovanja iz oblasti Medicine bola u zemljama zapadnog Balkana)

Pise: prof.dr Danko Živkovic

U cilju bolje edukacije zdravstvenih radnika 27.11.2018 u Beogradu je započeo sa radom međunarodni projekat u sklopu aktivnosti ERASMUS + KA2 projektu: “Strengthening Capacities for Higher Education of Pain Medicine in Western Balkan Countries -HEPMP” (Jačanje kapaciteta visokog obrazovanja iz oblasti Medicine bola u zemljama zapadnog Balkana).

Ciljevi projekta HEPMP su: jačanje kapaciteta visokog obrazovanja u oblasti medicine bola u zemljama Zapadnog Balkana, edukacija zdravstvenih radnika u oblasti medicine bola, usavršavanje kurikuluma subspecijalizacije Medicine bola na postdiplomskim studijama, kao i razvoj obrazovnog programa iz oblasti medicine bola na osnovnim studijama

Medicinskog fakulteta, te uspostavljanje akademske mreže i poboljšanje stručne saradnje uz pomoć savremenih tehnologija (internet, telemedicina, itd.). Navedeni ciljevi proizašli su iz činjenice da je bol vjerovatno jedan od najstarijih i najuniverzalnijih oblika stresa i jedna od najranijih patnji čovječanstva. Pratilac je mnogih bolesti i stanja i uprkos naporima i činjenici daje star koliko i samo čovječanstvo, bol niti je dovoljno shvaćen niti ga je moguće kontrolisati u potpunosti, a svijest zdravstvenih radnika o značaju liječenja bola je na niskom nivou.
