Erazmus+ projekat Izgradnje kapaciteta u visokom obrazovanju

Jačanje kapaciteta visokog obrazovanja iz oblasti Medicine bola u zemljama Zapadnog Balkana

Zašto HEPMP projekat

- Bol je verovatno jedan od najstarijih i najuniverzalnijih oblika stresa i jedna od najranijih patnji čovečanstva.
- Pratilac je mnogih bolesti i stanja, kao što su: reumatoidni artritis, postherpetična neuralgija, degenerativna stanja kičme, osteoartritis, AIDS, migrena, dijabetesna neuropatija i fantomski bol, kao i bol usled karcinoma.
- U ekonomskoj sferi se procenjuje da troškovi lečenja pacijenata sa hroničnim bolovima premašuju ukupne troškove lečenja bolesnika sa srčanim oboljenjima, karcinomom i AIDS -om.
- Produženi bol je jedan od glavnih uzroka odsustva sa posla, bolovanja, penzionog invaliditeta, otpremnina i niske produktivnosti. To je problem javnog zdravlja zbog njegove prevalencije, visokih troškova i negativnog uticaja na kvalitet života pacijenata i njihovih porodica.
- Uprkos naporima i činjenici da je star koliko i samo čovečanstvo, bol niti je shvaćen niti ga je moguće kontrolisati u potpunosti.
- Među zdravstvenim radnicima vlada niska svest o važnosti lečenja bola.
- Broj lekara obučen za medicinu bola je nedovoljan.
- Moramo unaprediti znanje o bolu i podizati svest o značaju ovog problema, kako stručnjaka - zdravstvenih radnika, tako i društva u celini.

Ciljevi projekta HEPMP

- Jačanje kapaciteta za visoko obrazovanje u oblasti medicine bola u zemljama Zapadnog Balkana;
- Razvijanje pružanja usluga medicine bola u zemlji, pružanjem kvalifikovanog i obučenog osoblja;
- Podržavanje operacionalizacije nedavno uspostavljenog obrazovnog programa u obliku subspecijalizacije iz oblasti medicine bola i mogućnosti razvoja dodiplomskih obrazovnih programa;
- Uspostavljanje akademske mreže i poboljšanje stručne saradnje uz pomoć savremenih tehnologija (internet, telemedicina, itd.)

HEPMP

HIGHER EDUCATION PAIN MEDICINE PROJECT

HEPMP in the light of COVID-19 pandemic

Dear HEPMP partners, dear colleagues,

In light of the COVID-19 outbreak that unfortunately affected all HEPMP participating countries, as it is now to the highest extent Italy but also all other partners who have closed universities, limited border crossings, and introduced other safety measures and in line with the EACEA instruction to follow the recommendations of local authorities we are forced to put into effect the following measures:

- following recommendations of local authorities and in the face of increasing effects of COVID-19 epidemic all HEPMP related travels, both international and within participating countries as well as all planned events should be postponed for the period, as it seems at this point, around three months
- the development of outputs should be continued if all possible. Having in mind that most of us are members of crisis teams and crucial in fighting against the virus spreading, unfortunately, we need to make sure that we set the priorities and work in line with national crises recommendations. Consequently, I'm relying on your good judgement to set the priorities and keep me informed on what is possible for you in light of the planned output development.

We will keep track of the developments related to the corona pandemic in the neighbouring countries and Italy and we will inform you on the continuation of the project activities as soon as circumstances allow.

As soon as the outbreak is under control, we will make a crisis impact assessment and develop a contingency plan on completing all project outputs.

I'm wishing you all to stay safe and healthy and hope that the state of emergency in our countries will be as short as possible. I would also like to extend the words of support to colleagues from Italy who are by far fighting the toughest battle.

Kind regards,
Project coordinator of the University of Belgrade
Prof. Predrag Stevanović
