Jačanje kapaciteta visokog obrazovanja iz oblasti Medicine bola u zemljama Zapadnog Balkana

STRENGTHENING CAPACITIES FOR HIGHER EDUCATION OF PAIN MEDICINE IN WESTERN BALKAN COUNTRIES - HEPMP PROJECT NUMBER: 585927-EPP-1-2017-1-RS-EPPKA2-CBHE-JP

Dear friends, dear colleagues,

The Covid-19 outbreak slowed us down in a number of activities, but it didn't stop us. As we have received approval from the EACEA to extend the HEPMP project until October 14, 2021, we have ample time to complete all necessary activities in the new circumstances. I sincerely suggest to all project activity managers to make an effort and prepare an alternative way of organizing unfinished project obligations. This primarily refers to the way of organizing our gatherings at certain universities. I think that, given the situation with the pandemic in the whole world, and even in our countries, it is realistic to plan activities (gatherings) online.

This is certainly a challenge for all of us, but I think that all our universities have already started online teaching, and it is up to us to use the existing resources. Please send me a proposal of dates for online meetings in the next two weeks, which you should organize according to the project plan in the next period (study the letter I sent to the EACEA when I applied for the project extension - I sent it to you). I suggest that we complete all activities by the end of April 2021. When I receive your suggestions, I will compile them into a joint Gantt chart of activities (you have also received a Gantt chart proposal, so try to plan activities accordingly).

One of the important tasks of the **HEPMP** project (<http://hepmp.med.bg.ac.rs>) is **APMN** application development, the program, which should enable us to be in easier, faster and more efficient contact in the future. I am happy to finally present you an application called

Dragi prijatelji, poštovane kolege,

Covid-19 pademija nas je usporila u brojnim aktivnostima, ali nas nije zaustavila. Kako smo od EACEA dobili odobrenje za produženje HEPMP projekta do 14 oktobra 2021. godine, imamo dovoljno vremena da u novim okolnostima završimo sve potrebne aktivnosti. Iskreno sugerisem svim rukovodiocima projektnih aktivnosti da se potrudite i pripreme alternativni način organizacije nezavršenih obaveza iz projekta. To se pre svega odnosi na način organizacije naših skupova pri pojedinim univerzitetima. Mislim da je, obzirom na situaciju sa pandemijom u celom svetu, pa i u našim zemljama, realno da aktivnosti (skupove) planiramo online.

To svakako predstavlja izazov za sve nas, ali mislim da su svi naši univerziteti već krenuli sa online nastavom, a na nama je da iskoristimo postojeće resurse. Molim vas da mi u naredne dve nedelje dostavite predlog termina za online skupove koje treba da po projektnom planu organizujete u narednom periodu (proučite dopis koji sam poslao EACEA kada sam se obratio za produženje projekta – poslao sam ga i vama). Predlažem da sve aktivnosti završimo do kraja aprila 2021. godine. Kada dobijem vaše predloge, ja ću ih sastaviti u zajednički gantogram aktivnosti (dobili ste i predlog gantograma, te probajte da planirate aktivnosti u skladu sa njim).

Jedan od bitnih zadataka **HEPMP** projekta (<http://hepmp.med.bg.ac.rs>) je razvoj aplikacije, **APMN** programa, koji treba da nam omogući da ubuduće budemo u lakšem, bržem i efikasnijem kontaktu. Srećan sam da vam konačno predstavim aplikaciju pod nazivom

APMN – Academic Pain Management Network

APMN - Academic Pain Management Network

APMN can be accessed via the **web address**:

apmn.med.bg.ac.rs

as well as mobile apps (tablet, iPad, mobile phones; both iOS and android). These applications can be found as “APMN” at “App store” for iPad and Iphone, and in the “Play Store” for Android devices, tablets and mobile phones.

The link with the instructions for use can be found at:

apmn.med.bg.ac.rs/manual.html

but in a program home page: apmn.med.bg.ac.rs

The direct link to the video tutorial is:

apmn.med.bg.ac.rs/assets/APMN.mp4

Please distribute information about the application to all members of the project teams, but also to all interested colleagues, to whom it can serve for better communication. The next six months is a trial period, so all the suggestions, problems, as well as ideas for improving the application, which are indicated to you during use, would be significant and you can send them to:

apmn@med.bg.ac.rs

I sincerely look forward to more intensive communication among colleagues through the **APMN** app.

With the desire to save you and your families during the Covid-19 pandemic, as well as to help your patients as successfully as possible,

With best regards,

Project coordinator

Prof Predrag Stevanovic, MD, PhD

APMN se može pristupiti putem **web adrese**:

apmn.med.bg.ac.rs

kao i aplikacija za mobilne uređaje (tablet, Ipad, mobilne telephone; kako ios tako i android). Aplikacije možete naći kao “APMN” na “App store” za Ipad i Iphone, a u “Play prodavnici” za android uređaje, tablete i mobilne telephone.

Link sa uputstvom za korišćenje se nalazi na adresi:

apmn.med.bg.ac.rs/manual.html

ali in a početnoj stranici programa: apmn.med.bg.ac.rs

Direktan link ka video tutorijalu je:

apmn.med.bg.ac.rs/assets/APMN.mp4

Molim vas da distribuirate informaciju o aplikaciji svim članovima projektnih timova, ali i svim zainteresovanim kolegama, kojima ona može poslužiti za bolju komunikaciju. Narednih šest meseci je probni period, tako da bi sve sugestije, problemi, kao i ideje za unapredjenje aplikacije, koje vam se korišćenjem ukažu, bile značajne i možete ih slati na adresu:

apmn@med.bg.ac.rs

Iskreno se radujem intenzivnijoj komunikaciji medju kolegama kroz **APMN** aplikaciju.

Uz želju da se vi i vaše porodice sačuvate tokom Covid-19 pandemije, kao i da što uspešnije pomognete vašim pacijentima,

Uz iskren pozdrav,

Koordinator projekta
